System requirements

Supporting the beauty of prints and operability Raster Link 7

### ■Specifications

Item		JFX200-2513 EX	
Head		On-demand Piezo head (Array of 3 staggered print heads)	
Print resolution		300dpi, 450dpi, 600dpi, 900dpi, 1,200dpi	
Ink	Type/Color	Rigid UV curable ink LH-100	
		Stretchable UV curable ink LUS-120/LUS-150/LUS-211/LUS-350	
	Capacity*(1)	1L bottle / 250 ml bottle	
	Ink circulation sysytem*(2)	White ink circulation by MCT (Mimaki Circulation Technology)	
Maximum printable area (WxD)		2,500 x 1,300 mm (98.4x 51.2")	
Media	Size (WxD)	2,500 x 1,300 mm (98.4x 51.2")	
	Height	50 mm (2.0 ") or lower	
	Weight	50kg/sqm (110.2 lb/sq. ft2) or less (non concentrated load)	
Media Suction		Vacuum Suction + Foot Switch	
Suction Areas		2 partition ( X direction)	
UV method		LED-UV	
Interface		USB, Ethernet	
Applicable standards		VCCI class A, CE mark, CB report, U.S. safety standard UL (UL62368-1) RoHS Directive, FCC Class A, Machinery directive, EAC, RCM	
Power		Single-phase AC200 to 240V, 12A or lower	
Power consumption		2.88 kVA or less	
Operating environment	Temperature	15-30 degC (59 - 86 degF)	
Temperature	Humidity	35 - 65%Rh	
	Optimal Temperature	20 - 25 degC (68 - 77 degF)	
	Temperature Gradient	Less than $\pm$ 10 degC/h ( $\pm$ 18F/h)	
	Dust	Equivalent to an Office	
Installatoin Dimensions(W x D x H)		4,440 x 2,250 x 1,250mm (173.2 x 88.5 x 49.2")	
Assembled Dimensions (W x D x H)		4,440 x 2,450 x 1,250mm (173.2 x 96.4 x 49.2")	
Weight		650kg (1,433 lb)	

USB2.0 Ethernet

Connection

#### Optional Accessories

ltem	Item No.	Remarks
lonizer kit	OPT-J0342	Static eliminator kit
Vacuum unit ( $\varphi$ 3mm × 200mm) ( $\varphi$ 0.1 in. × 7.9 in.))	OPT-J0216	Three-phase, 200 V-240 V, 30 A, 3.4kW
Vacuum unit ( $\varphi$ 1mm × 200mm) ( $\varphi$ 0.04 in. × 7.9 in.))	OPT-J0217	Single-phase, 200 V-240 V, 30 A, 1.9kW
Vacuum unit ( $\varphi$ 3mm × 400mm) ( $\varphi$ 0.1in. × 15.7 in.))	OPT-J0232	Three-phase, 380 V-480 V, 20 A, 3.4kW
Optional blower Connector Kit	OPT-J0348	Necessary kit for connecting an optional vacuum unit
4C+4White ink applying kit	OPT-J0499	Necessary kit for 4C+4White ink set
Lift-Up Block	OPT-J0513	

optional accessories available with JEX200-2513 are also compatible with JEX200-2513 EX.

\*OPT-J0393 PR-100/PR-200KIT is not necessary to use JFX200-2513 EX. However when starting to use PR-200, it is necessary to replace to the pump of the initial attachment

# Inks and substrates:

-As physical properties of ink (adhesion, weather resistance etc.) are different depending on media, please be sure to have a print test in advance.

 Depending on the application, primers, other surface treatment or surface protection such as lamination may be necessary.

# Automation of printing processes

Adaptable to "Mimaki Device Language (MDL)" to realize automation of printing processes

Using MDL commands allows you to automate printer control, job management, and workpiece conveying device operation from an external device

\*When using MDL commands, refer to the separate MDL commands manual included in the SDK \*Please note that machine failures due to MDL commands may not be covered by our warranty.

#### Supplier

PC for RIP

Recommended specifications

CPU: Intel<sup>®</sup> Core™ i5-4670K (3.4GHz) Chip set: Intel® Z87 Express

Interface: Ethernet port USB1.1/2/0

for PC for RIP

Memory: 8GB

HDD: 1TB

OS: Windows 11<sup>®</sup> Pro 64bit

#### About Ethernet

\*Please use Category 6 (CAT6) network cables. \*Cannot be connected through the router. \*When printing from ethernet, place the printer and output PC on the same network \*When using a switching hub, a 1000BASE-T compatible hub is necessary. Although up to 4 printers can be registered with RasterLink7, printing may stop depending on the network environr

A Safety notice:

## This product is equipped with UV irradiation equipment

Please pay attention to the following notes in order to use safely. •Do not look directly into the UV light source nor place your hand, or expose your skin directly to the UV light source

 Depending upon print mode, some VOC emittance from printed parts not yet cured and hardened may occur In addition, please be sure to read and follow the instructions and guidelines of the manual carefully.

Some of the samples in this catalog are artificial renderings. Specifications, design and dimensions stated in this catalog may be subject to change without notice (for technical improvements, etc). The corporate names and merchandise names written on this catalog are the trademark or registered trademark of the respective corporations. Inkjet printers print using extremely fine dots, so colors may very slightly vary after replacement of the printing heads. Also note that if using multiple printer units, colors could vary slightly from one unit to other unit due to slight individual differences. The specifications described in this catalog are as of December 2023.

# Entry model combining high added-value and high productivity

# Feel the texture!

# Semi-stereoscopic 2.5D printing increases utility!

JFX200-2513 EX maximizes the productivity and user-friendliness of the JFX200-2513, the industry's best-selling UV-LED curing flatbed inkjet printer, and enables high value-added printing. The JFX200-2513 EX maximizes the productivity and

Suitable for large format sign graphics, interior/decoration and fine arts. seeking quality

Three image control technologies to realize high quality

.... •... . . . . . . .

Semi-stereoscopic 2.5D printing made easy ! High value-added printing with "2.5D Texture Print" in "RasterLink7"!

Stereoscopic appeal with 2.5D printing

A newly developed function, "2.5D Texture Print" in Mimaki's original RIP, "RasterLink7" allows you to easily create multi-layered gradation data.

The "Emboss Print", one of Mimaki's printing solutions, "Surface Imaging" makes a surface look bumpy with multi-layered UV ink printing, which requires a manual preparation of step-wise data for each layer to create smoother expression. However, "JFX200-2513EX" allows you to easily create 2.5D print data of different layer with steps, simply by using "RasterLink7" (Standard accessory) and Illustrator/Photoshop.

When stacking layers of the same size When stacking stepped laver

othness cannot be achieved. but data is needed for each layer but sr

## You can create data using Photoshop/Illustrator and Raster Link 7

Simple creation of smooth-stereoscopic 2.5D prints is available with the JFX200-2513 EX to easily show the bumpy surface like woodgrain of interior material, elevated ink of oil-paintings and letters for an impressive look for signage. Not only coloring but also adding smooth print texture can deliver added value.

# Higher-grade productivity and doubled White + Color simultaneous print speed!

## The printer allows you to respond to demand for short-term delivery.

JFX200-2513 EX prints two times as fast as JFX200-2513 in White + Color simultaneous printing. The newly added Draft mode (300x300HQ 4P Bi Normal) can deliver print speeds up to 35m2/h (376.7 ft2/h) in 4-color + White simultaneous printing.

I You can choose the most suitable ink depending on your material and application.

Please use OPT-J0499(4C+4Wthie ink applying kit) for [4C+4W] printing.

## Links with external stop interface allow users to meet safety standards that are different by factory

Other than the standard emergency stop switch, customers can also have the printer work with safety measures that suit their environmen The product can support various safety standards depending on the customer, including safety light curtain and safety mat.

# 1. Waveform control

By discharging spherical ink droplets directly, depositing of droplets and overlapping between dots is reduced, achieving a sharp print quality with low grain.

< Non-spherical discharge:

< Discharged in a nearly true spherical state >

High precision landing is possible. Sharp finish with little grain.

# 2. Variable dots

Three different ink dot sizes are used in printing to enable high-quality prints with reduced graininess.

< Fixed Dot Image

### < Variable Dot Image >

Dots are combined including the minimum size of 5pl to enable grainless, smooth color printing.

#### 3. MAPS (Mimaki Advanced Pass System)

Banding (horizontal stripes), uneven color, or glossy streal can be reduced to produce smooth prints by printing pass , boundaries fading in gradation.

< Without MAPS (Image) >

### < With MAPS (Image):

Based on printing conditions such as media/ink type and resolution, the most suitable gradation pattern is automatically selected and printed.

With Ethernet support

# Usability achieved based on

# Mimaki's long time experience UV flatbed printers

As a pioneer of UV flatbed printers,

Mimaki knows everything about ease of use from its long experience. We provide the design that is simple to use and reduces workload, plus a preventive safety function to avoid trouble during printing.

# Foot switch for vacuum control

#### More environment-friendly business model
